# Scientifically Proven to Not Increase Your Dog's Internal Body Temperature

We conducted a major heat study that PROVED that wearing a K9 Storm Ballistic Vest in hot conditions has zero effect on your dog's internal body temperature. Watch the heat study video above or download the entire 100 page heat study, [here](#).

# Unrivaled Fit

Since 1998, the K9 Storm Patrol Swat Vest has been the custom-fit body armor of choice for k9 units in over 35 countries. Every single Patrol Swat Vest is individually made to your dog's own unique measurements using our patented self-adjusting sizing kit process. This allows your working dog to have a full range of mobility and agility. Our custom-fit design allows your dog to work effortlessly in their Patrol Swat Vest for their entire shift, 100% of the time.

Your working dog's Patrol Swat Vest is a one-off product - it will fit your dog perfectly, and your dog perfectly alone.

# New Ultra-Light Ballistic Panels

It's time to rethink everything you've ever thought about tactical body armor.

The K9 Storm Patrol Swat Vest is the lightest police dog body armor available. 40% lighter and 55% thinner than our previous model, the new Patrol Swat Vest ballistic panels weigh, on average, only 1.5 lbs. Our panels are now only an 1/8" thick.

Our newest ballistic technology is now available in every K9 Storm Vest.

# Track, Search, Rappel, Extract, & Apprehend

The K9 Storm Patrol Swat Vest is your all-in-one solution for your working dog and is recommended that handlers both train and work 100% of the time in their gear. Eliminate all additional products and allow your dog to do their job and come home safe.
